ESG Latam Fund, a sub-fund of ZCH AM SICAV, ZCH (ISIN: LU1837198826)

This sub-fund is managed by Luxembourg Investment Solutions S.A.

Objectives and investment policy

The Sub-Fund seeks to provide long-term capital growth by investing principally in equity securities issued by Latin American companies, and American Depositary Receipts of Latin American companies, while minimizing environmental, social and governance ("ESG") risks through selectivity. The Sub-Fund aims to achieve diversification in terms of sectors offering a core exposure to the Latin American stock markets and to companies listed on a stock exchange outside the Latin American region, but which generate a significant part of their income in or from Latin America and/or which have their registered office in Latin America. The investment manager seeks to add value primarily through stock selection as part of the active management without using a reference Benchmark.

Investments may be denominated in USD or other Latin American currencies. Currency risks may be hedged entirely or partially against USD through the use of financial derivative instruments including currency forwards or futures.

The Sub-Fund may suit investors seeking for a diversified and growth orientated investment strategy and is appropriate for

investors who are investing for long-term capital growth and who are willing to accept market volatility.

Investors may demand to redeem their units every normal bank business day in Luxembourg.

The revenues of the fund will be distributed yearly after the financial year end.

The Sub-Fund is appropriate for investors with a time investment horizon exceeding 5 years.

Risk and reward profile

More about this rating

- The risk category is based on return volatility over the last five years. The method used for this estimation depends on the type of fund.
- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may vary over time.
- The lowest category does not mean 'risk free'.

Why is this fund in Category 6?

The fund will be mainly invested in equities issued by Latin American companies and then will be mainly exposed to emerging markets stocks. Emerging markets are at an early stage of development which may involve a high level of price volatility, lower market transparency, regulatory hurdles, corporate governance and political and social challenges. There is increased return potential and higher risk as reflected in the risk category.

Further material risks:

- **Operational risk:** the sub-fund's operations depend on third parties and it may suffer disruption or loss in the event of their failure.
- **Liquidity risk:** A Sub-Fund is exposed to the risk that a particular investment or position cannot be easily unwound or offset due to insufficient market depth or market disruption.
- **Financial techniques:** the sub-fund may use financial derivative instruments to hedge (minimize) risks. This may not be effective and, depending on market movements, may reduce gains or accentuate losses in the sub-fund.
- **Counterparty risk:** a counterparty may fail to repay or otherwise withstand contractual obligations to the sub-fund.
